ICES - Stock assessment & advice

1. Preparation work at member institutes - data analysis
2. ICES Working Group (WG) meeting - review, report, early draft advice
3. ICES Advice Drafting Group (ADG) meeting - draft advice
4. ICES Advisory Committee (ACOM) meeting - final advice

Transparent Assessment Framework (TAF)

Transparent Assessment Framework (TAF)

Should be:

- ▶ **Encapsulated:** entire pathway from raw data to advice in one system
- ▶ **Repeatable:** data preparation and assessment workflow is recorded
- ▶ **Transparent:** anyone can browse on the web

New framework: TAF

Make it easier to:

- ▶ Find data and results from a given assessment
- ▶ Rerun model with different data or assumptions
- ▶ Prepare and run an update assessment
- ▶ Access ICES data web services

⇒ Will save time for scientific and advisory workflow

New framework: TAF

Help people to:

- ▶ See **changes** in model setup and data between years
- ▶ Use reproducible research to strengthen **institutional memory**
- ▶ Access data and results from all stocks for **big-picture research**

Core workflow

get data
=> model input files

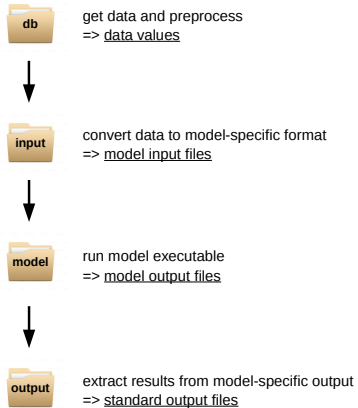

run model executable
=> model output files

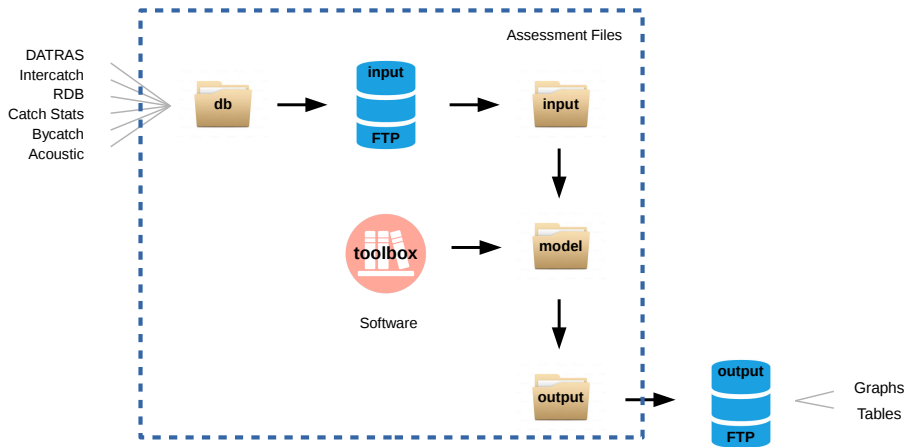

extract results from model-specific output
=> standard output files

Preprocessing data

Data archives for input and output

R packages supporting TAF workflow

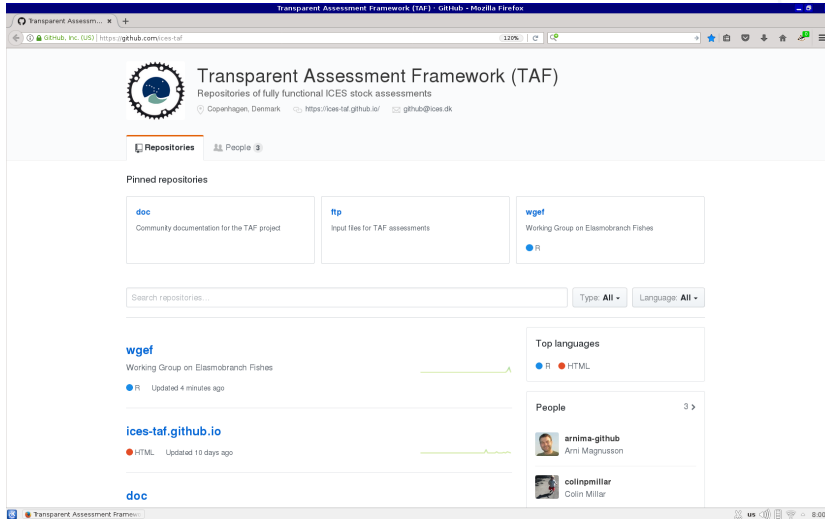

Web services

- icesDattras** trawl survey database
- icesSAG** stock assessment graphs
- icesSD** stock database
- icesVocab** reference codes

Other

- icesAdvice** advisory methods
- icesTAF** support functions

GitHub assessment repository

The screenshot shows the GitHub profile page for the 'Transparent Assessment Framework (TAF)' repository. The page is viewed in a Mozilla Firefox browser window. The repository is owned by 'ICES CIEM' and is located in Copenhagen, Denmark. It has 3 pinned repositories: 'doc' (Community documentation for the TAF project), 'ftp' (Input files for TAF assessments), and 'wgef' (Working Group on Elasmobranch Fishes). The 'wgef' repository is the most recent, updated 4 minutes ago. The 'doc' repository is updated 10 days ago. The 'ftp' repository is updated 10 days ago. The page also shows a search bar, a 'Type' dropdown set to 'All', and a 'Language' dropdown set to 'All'. The 'Top languages' section shows 'R' and 'HTML'. The 'People' section lists 'arnima-github' (Arni Magnusson) and 'colinmiller' (Colin Millar).

Assessment = R scripts

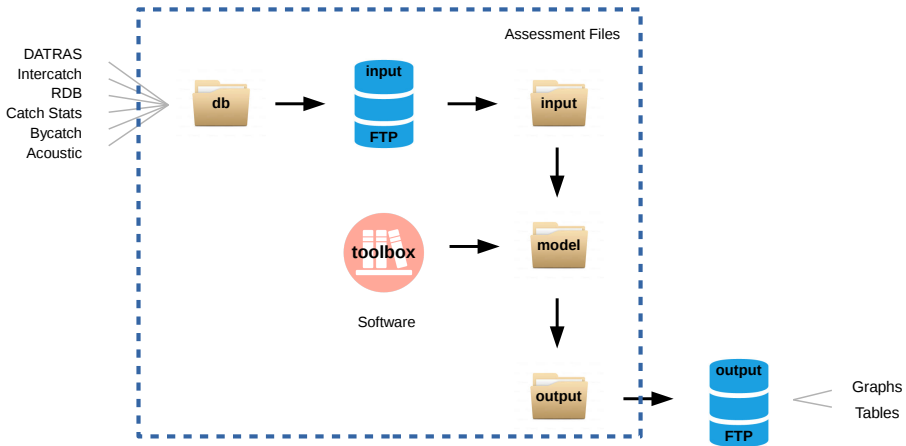

The screenshot shows a GitHub repository page for 'wgeif/2015/rjm-347d' at the master branch. The repository is owned by 'arnima-github'. The page displays a list of files in the 'wgeif / 2015 / rjm-347d /' directory. The files are:

- clean.R
- db.R
- input.R
- model.R
- output.R
- plot.R
- run.R

The files 'db.R', 'input.R', 'model.R', and 'output.R' are grouped under the category 'Preprocess data'. The file 'plot.R' is categorized as 'Convert to model format'. The file 'run.R' is categorized as 'Run analysis'. The file 'output.R' is categorized as 'Extract results'. The file 'db.R' is highlighted with a red box.

At the bottom of the page, there is a footer with the text: © 2017 GitHub, Inc. Terms Privacy Security Status Help. On the right side, there are links: Contact GitHub API Training Shop Blog About.

TAF overview

Web user interface

(design outline)

Open taf.ices.dk in a web browser

Browse (everything is open) or **log in** to modify/run assessments

- Stock mode

upload, edit, save, run

- Boss mode

HAWG	NWWG
<input checked="" type="radio"/> her-3a22	<input checked="" type="radio"/> cod-iceg
<input type="radio"/> her-47d3	<input checked="" type="radio"/> sai-faro
<input checked="" type="radio"/> her-67bc	<input checked="" type="radio"/> sai-icel
<input checked="" type="radio"/> her-irls	<input type="radio"/> smr-5614
<input type="radio"/> ...	<input type="radio"/> ...

Download any dataset into R using **read.csv**

Key benefits

- ▶ High **quality** science: online, peer-reviewed, reproducible
- ▶ Improved **time efficiency** and **reduced workload** on WGs
- ▶ Much more **open and structured** than current workflow

Follow ongoing development

ICES (1 week)

- ▶ Introduction to stock assessment
- ▶ Advanced stock assessment
- ▶ Introduction to the R environment
- ▶ AD Model Builder (ADMB)
- ▶ Template Model Builder (TMB)

United Nations University (6 months)

Fisheries training programme:

- ▶ Fisheries policy & planning
- ▶ Resource assessment & monitoring
- ▶ Quality management & processing
- ▶ Management of companies & technology
- ▶ Sustainable aquaculture

Summary

Summary

ICES - assessment reviews, annual science conference, etc.

Modern workflow - fully scripted and transparent online

Statistical computing - R, AD Model Builder, Template Model Builder

CIP - capacity building and collaboration with United Nations University

Training courses - can also be organized in Havana

Thanks!
